SUMMARY

Master's student at Carnegie Mellon with a B.E. in Computer Science and hands-on experience in full-stack development and applied AI. Built production-ready applications using Java, Spring Boot, React, and AWS, and implemented a RAG-based AI chat system using LangChain and GPT-4. Seeking a Software/AI Engineer role; available for fall 2026 intern/co-op (from Aug 2026); no sponsorship required.

EDUCATION

Carnegie Mellon University

Master of Information Systems Management – Business Intelligence and Data Analytics GPA: 3.74

Pittsburgh, PA

08/2025 - 12/2026

University of California, Irvine

Exchange Program: Success Through Academics and Research (STAR) GPA: 4.0

Irvine, CA

09/2024 - 06/2025

Hangzhou Dianzi University

Bachelor of Engineering in Computer Science and Technology (GPA: 89.52 Dean's List)

Hangzhou, China

09/2021 - 07/2025

SKILLS

Programming: Java, JavaScript, Python, SQL, C, C++, R, Kotlin, Go

Databases: MySQL, PostgreSQL, Elasticsearch

Frameworks and Libraries: Spring Boot, Express.js, Node.js, React, LangChain, REST API, HTTPs, TCP/IP

Cloud and DevOps: AWS, Google Cloud Platform, Docker

Tools: Git, Postman, Spark, Tableau, Power BI, MATLAB, SPSS

AI: Machine Learning, Deep Learning, RAG, MCP, AI Agent, Fine Tuning, Prompt/Context Engineering

EXPERIENCE

Ligentia

Irvine, CA

Data Scientist Intern

03/2025 - 05/2025

- Analyzed energy consumption-output data from 50+ machines using NumPy and Pandas; co-developed 6 **Python** models with Scikit-learn, recommending a polynomial regression **model** that optimized energy efficiency
- Integrated Python Plotly custom visuals into **Power BI** dashboards, extending native visualization capabilities and enabling more flexible **client-facing analytics**; built a year-over-year client analytics dashboard tracking customer behavior, finance, delivery to support strategic planning
- Designed and standardized 5+ Power BI dashboards by establishing reusable reporting structures, improving visual consistency and reducing dashboard development time

PROJECTS

Multimodal RAG Chat Application

Pittsburgh, PA

<https://github.com/EvieWei0720/ChatAI-Sound>

02/2026 - 04/2026

- Built an end-to-end chat application with **React** frontend, **Express.js** backend integrating **GPT-4** and **Speechify APIs** to support real-time text and voice-based AI conversation
- Implemented **RAG pipeline** with **LangChain** and **MCP** to enable context-aware, document-grounded responses; designed **MySQL** schema for persistent chat history storage
- Designed React component architecture supporting both text and audio output, enabling a multimodal conversational experience

Food Online Ordering System

Pittsburgh, PA

<https://github.com/EvieWei0720/OnlineOrder>

12/2025 - 02/2026

- Developed a full-stack food online ordering system with **Spring Boot** backend and **React** frontend, deployed on **AWS App Runner** for scalable and production-grade access
- Built layered Spring Boot architecture (Controller - Service - Repository) with **Spring Security JWT authentication**; integrated **Caffeine Cache** to minimize repeated **PostgreSQL** lookups on high-read endpoints
- Implemented data access with **Spring Data JDBC** backed by PostgreSQL; containerized database with **Docker** and managed via **AWS RDS**
- Built restaurant browsing, menu search, cart management, and checkout flow in React with Ant Design; integrated **REST API** endpoints for user registration, menu search, ordering, and payment processing
